

(A) All simulation settings

(B) Small diff. in ancestral allele freq.

Adjustment technique

- 1 PC
- 4 PCs
- Model-based admixture prop.
- None

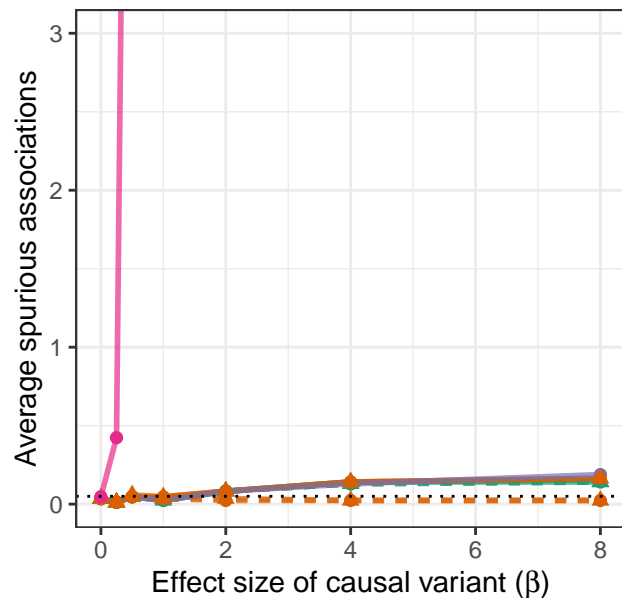

LD-based exclusions

- None
- Regions with high/extended LD

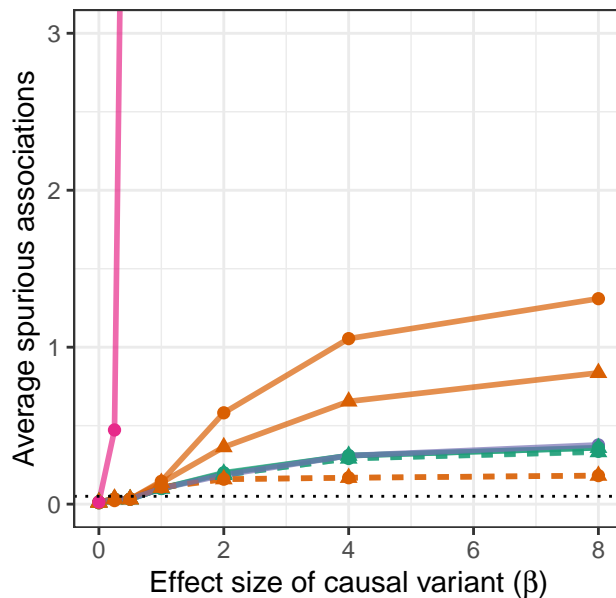

LD pruning

- None
- $r^2 < 0.1$ , window = 0.5 Mb

(C) Low loading

(D) High loading

(E) Highest loading
